国際コンファレンス「移行経済における制度多様性と経路依存」

【開催の趣旨】

欧州移行経済諸国は、一様に市場経済化を進展させたものの、市場を支える制度設計は収斂するよりは多様性を示し、また、同時に旧社会主義時代の諸制度を包摂しながら経路依存的なブリコラージュを示しているとされる。本国際コンファレンスでは、欧州移行経済諸国の経路依存的な市場制度の多様性に着目し、それを証明する現代経済・社会理論を再検討するとともに、各国ケース・スタディを通じた資本主義多様性論および経路依存性論の展開を展望する。

【開催日】 2016 年 2 月 23 日（火） 11：00～17：30

International Conference
Diversity of Institutional Settings and Path-dependency
in Transition Economies

organized by

Institute of Economic Research (KIER), Kyoto University,
Co-organized by KIER Joint Usage and Research Center Project “Diversity of Institutional Settings and Path-dependency in Transition Economies”, the Future Development Funding Program of Kyoto University Research Coordination Alliance, Center for Far Easter Studies of University of Toyama, and KIER Foundation.

Aim of the Conference

The purpose of this International Conference is to understand path-dependent evolution of economic and social institutions in transition economies. After the market transition, the former socialist countries have changed their economic system into capitalism. At the same time, all the transition economies indicated various outcomes of post-socialist regime in the former Soviet Union and Eastern Europe. For understanding such diversity, there are some economists who highlighted transitions from the path-dependent evolution and the historical legacies. Such arguments can be made at a high level of generality and we can apply the above approach into another area. In this conference, we reexamine the approach of path-dependency in theoretical and empirical perspective, and we will discuss the potential how we generalize it for the development of comparative economics.
